

## 5th Grade Paul Reichertz

*\* Catholic East \**

**Where  
Every Student  
Shines!**

In teaching 5<sup>th</sup> grade here at Catholic East Elementary, I want my students to take pride in their work and use the abilities that God blessed them with. I have been teaching here since 2007 and have an additional three years of full-time teaching experience.

I received my degree in Education with a minor in History and Social Studies from Wisconsin Lutheran College. At the present time, I am working towards my master's degree in Education at Cardinal Stritch University. I also have an advanced certification in Religious Education.

I live on the east side of Milwaukee to be close to school and get involved with the neighborhood near school. I enjoy furthering my education and playing guitar. Going back to school takes up a lot of my free time, so I like to play my guitars to relax.

I love teaching at the 5th grade level! I have the opportunity to watch our children grow from primary grades to developing skills needed to succeed at the middle school level. I expect my students to learn principles and values, as they will need a good start in growing to be active, responsible adults.
